Voting members
<ul style="list-style-type: none">• ORNL – Jay Jay Billings – <i>present</i>• IteMa – Torkild Ulvøy Resheim – <i>present</i>• Kichwa Coders – Tracy Miranda – <i>present</i>• Diamond Light Source – Matthew Gerring – <i>excused</i>• Eclipse Foundation – Mike Milinkovich – <i>present</i>• IBM – Serban Maeran – <i>not present</i>
Non voting attendees
Total attendance: 4 of 5 voting members

Old business

Autumn Release

We all agreed it was a success. However The Science software is not listed on the main Eclipse download page. We need to provide something for the Foundation.

Project updates

DAWNSci

Nothing to report.

PTP

Nothing to report.

Triquetrum

Nothing to report.

Eclipse Advanced Visualization Project

Working on rendering parts in a web interface in addition the existing SWT implementation.

Eclipse ICE

Working on moving to a web interface.

Chemclipse

Nothing to report.

Rich Beans

Nothing to report.

January

Focusing on driving adoption, getting some articles out.

TeXlipse

The [project](#) has been approved. Creation review is scheduled for the 21st of December. Story posted in the Eclipse Newsletter and will also be posted at JAXenter, creating quite a buzz.

Scanning

Nothing to report.

Website Updates

We need a download page. So we'll work with the Foundation to copy parts of of the IoT site, it looks awesome.

Science Working Group Conference

Nothing to report.

LGPL Support from the Board

Need some help from the working group steering committee to formulate a reasonable and concrete proposal to submit to the board. LGLP 3.0 is a bit problematic as there are quite a bit of changes related to licence compliance that must be implemented. There is also some challenges related to statically and dynamically linked libraries as these must be handled differently.

New business

Newsletter & JAXEnter

The newsletter went really well. We got a lot of feedback.

DAWN HTC jobs on Titan?

Nothing to report. Some people needs to get connected.

Site visit at Airbus

We're probably going to make that fly! Alain is in charge.

Actions

- Torkild will create a *Google Group* for the Science Working Group Steering Committee. This will make it easier to share documents within the group.
- We should be able to create new issues on the "Science TLP" in Bugzilla, this is currently not possible. Jay/Mike will look at this.
